THE BLACK RAVEN™

TACTICAL FIXED-BLADE FIGHTER

US RETAIL: $199.00

A knife designed in Honor of the "Ravens", those legendary airmen who went into Laos in the late sixties to take the fight to the enemy in their own back yard! They flew missions into communist territory without the acknowledgement of their government, without the knowledge of their families and with no recognition for a job heroically done. The Black Raven is all Dark Ops, with CTV2 steel and a brutally strong tanto point design. Features a similar handle to the Basal Shadow, but is optimized for airborne crews who need a blade strong enough to cut through aluminum, sharp enough to smash through canopies and small enough to fit the body in cramped cockpits. 100% made in America! Choice of military Type 3 Hard Anodized (IR Invisible) finish or Carbon Black Titanium CarboNitride (TiCN) vacuum deposited finish. Sheaths adaptable for belt, vest, thigh, calf and outpack carry!
